1. Introduction

Oral health is a fundamental aspect of overall well-being, yet it often remains overlooked in public health discussions. This neglect can lead to significant disparities in health outcomes, particularly among marginalized communities who face barriers such as financial constraints, lack of awareness, and limited access to dental care services. Oral

health outreach programs are essential in addressing these issues by providing education, preventive care, and early treatment options to underserved populations.

These programs play a crucial role in reducing health disparities by promoting awareness and access to dental care, which can significantly lower the incidence of oral diseases. They also contribute to improving overall health outcomes, as poor oral health is linked to various systemic conditions like cardiovascular disease and diabetes. Furthermore, outreach initiatives enhance the quality of life for individuals by alleviating pain and social stigma associated with oral diseases

Keeping in view of the above facts; Maulana Azad Institute of Health Sciences under GNCT, Delhi initiated Mobile Dental Clinic Project under the umbrella of NHM/DSHM to provide Primary, Preventive, Promotive and Curative oral/ dental health care to underserved areas of NCT, Delhi on 1st May, 2014. **It is the “First of its Kind” project in India for Dental Outreach services.** The Program provides Dental Screening and treatment services, Dental Health Education and Capacity Building activities along with continuous quality assessment along with research.

The Six specially designed Mobile Dental Clinics cater to underserved population of Delhi. The Project aims to achieve the goals of the “Oral Health for All” by improving the access to Primary Oral Health Services. Further, the Project attempts to integrate the existing Health Care delivery services with the dental/oral services through an integrated need based dental care strategy. The Project has gradually evolved into various sub-components/ sub-initiatives targeting different special groups.

The various sub-initiatives are:

1. **Project NEEV: School Oral Health Care Program**
2. **Project ASHA HUMARI MUSKAAN: Maternal Oral healthcare Program**
3. **Project AMMA: Comprehensive Oral health care for Elderly**
4. **Project COPS: Community Oral Precancer Screening and Tobacco Cessation Services**
5. **Oral Healthcare for Persons with Disabilities.**
6. **Oral health Education and Awareness Campaigns**

2. Scope of Services

The Project is providing dental care services in all 11 districts of GNCT of Delhi.

The Mobile Dental Teams are catering to various areas/districts of Delhi in a scheduled fashion for 05 days in a week (Monday to Friday from 09.30 am to

02.00 pm). For optimum utilization of the Project and patient care; the teams work in coordination currently with the following areas:

- Delhi Govt. Dispensaries
- Schools under Department of Education, GNCT of Delhi
- Capacity Building Programs in collaboration with District ASHA Coordinators in all Districts.

- Senior Citizen Recreational Clubs under Department of Social Welfare and Social Justice, GNCT of Delhi.

These collaborative efforts are done to delivery of Primary, Preventive and Secondary level of dental care services to all vulnerable groups as well as communities across Delhi.

The range of treatment services provided includes:

1. Dental Screening
2. Dental restorations/tooth fillings
3. Oral Prophylaxis/teeth cleaning
4. Tooth Extraction
5. Root Canal Treatment
6. Dental Prosthetic treatments (Partial and Complete Dentures)
7. Tobacco cessation counselling
8. Oral Precancerous /Potentially malignant lesion screening
9. Preventive Treatment services like pit and fissure sealant applications, fluoride varnishes etc.
10. Medication (in liaison with dispensaries) & Referral for tertiary care

3. Project Outreach: The teams from Mobile Dental Clinic Project visit the locations for five days a week on rotational basis from 9:30 A.M. to 2 P.M.

➤ Further, the Vans regularly visit Delhi Govt. Schools as per the schedule for Project NEEV.

For the month of SEPTEMBER 2025 services of Mobile Dental Clinics were provided to following locations on rotational basis:

TOTAL LOCATIONS SERVED: 46 in 10 DISTRICTS (Details as under)

S. No.	Cluster	District	Dispensary Location	Distance from MAIDS

4.2. PROJECT NEEV: SCHOOL ORAL HEALTH PROGRAM

Oral diseases are the most common disease that affects people throughout their life time. The Global Burden of Disease Study 2017 estimated that oral disease affects at least 3.58 billion people

worldwide. Oral health is fundamental to general health and well-being. A healthy mouth enables an individual to speak, eat and socialize without experiencing active disease, discomfort or embarrassment. Children who suffer from poor oral

health are twelve times more likely to have restricted activity days than those who don't. Schools are microcosms of the larger community.

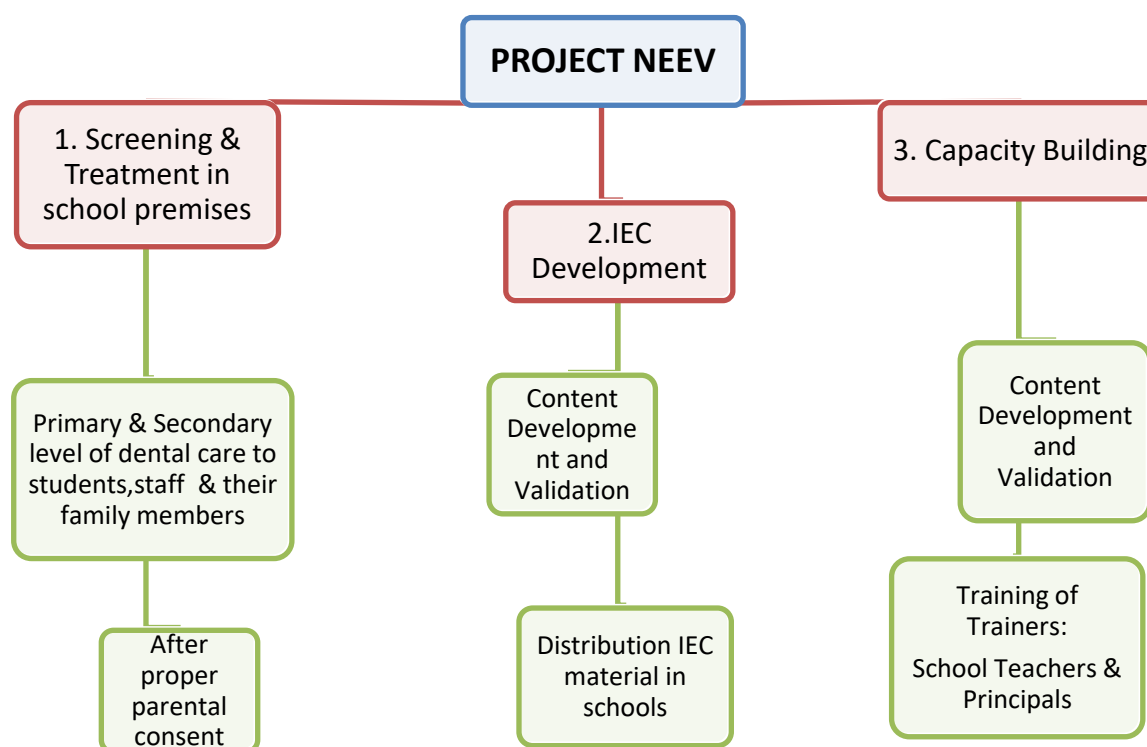

With existing structures and systems in place, schools provide excellent opportunities for integrating oral health into the curriculum that is acceptable, appropriate and effective. Children are receptive to guidance and they are familiar with the learning

environment and culture in school. Schools can effectively inform and influence students' oral health knowledge, beliefs, attitudes and behaviour. It is important to target children, particularly at kindergartens and primary schools. Pupils need to acquire knowledge and skills that facilitate a healthy lifestyle and help them cope with social and peer pressure. Children are empowered to take control over their own health early in their lives and are encouraged to develop positive attitudes toward preventive measures

Hence providing incremental oral health care in schools could prove pivotal in changing the current scenario of huge oral disease burden and large component of dental unmet needs.

Keeping in view of the above facts; the Mobile Dental Clinic Project initiated Project “Neev” in collaboration with School Health Scheme, since September 2014. The Program included Dental Health Education and Dental Screening with preventive Dental procedures. One day per week i.e. Wednesday was dedicated to School Oral health program. **It is a comprehensive oral health program for Govt. school children in rural areas encouraging the concept of health Promoting Schools.** Since Feb. 2016, treatment component was also added to provide dental treatment within school premises. It is a comprehensive oral health program for Govt. school children in rural areas encouraging the concept of health Promoting Schools.

4.3. PROJECT AMMA: COMPREHENSIVE ORAL HEALTHCARE FOR ELDERLY

The global population is growing as well as ageing. The age structure of the population is changing owing to demographic transition with increasing levels of life expectancy and decreasing levels of fertility in almost all countries, leading to an increase in both the share and number of older persons across world. With increasing life expectancy, the burden of Non-Communicable diseases a matter of concern for the community. According to Population Census 2011 there are nearly 104 million elderly persons (aged 60 years or above) in India; 53 million females and 51 million males. 5.9% of the population of Delhi comprises of citizens aged 60+. ¹ The projections indicate that the number of 60+ in Delhi will increase to 24.24 Lakhs in 2026. Continuous increase in life expectancy means that more people are now living longer.

Huge burden of Oral Diseases among Geriatric Population

To cater to the demand of high unmet health needs of geriatric population the concept of Geriatric day/Senior Citizen OPD Day is already existent in Delhi Govt. Dispensaries and Hospitals. However, oral health often remains neglected and an under-served realm. Almost 20% of the patients reporting to the OPD of Mobile Dental Clinics belong to geriatric

population such that on an average 450 to 500 patients per month seek dental care in Mobile dental vans. Almost 39% of the patients diagnosed with dental caries and 33% of the patients suffering from gingival/periodontal diseases belong to geriatric population clearly indicating high burden of oral diseases amongst this special group. Almost 14 % of the geriatric population suffer from edentulousness. This not only affects their general health but also affects the quality of life in general. A considerable number of geriatric populations have limited knowledge of the cause and prevention of oral disease as well.

Providing primary and secondary level of dental care to the geriatric population through a Comprehensive oral health care Program for Elderly is vital for a country like India which has a significant proportion of elderly population. Hence, considering the huge unmet dental need of the elderly population of GNCTD; the Mobile Dental Clinic Project has initiated **PROJECT “AMMA: COMPREHENSIVE ORAL HEALTHCARE PROGRAM FOR THE ELDERLY.”** The program has been initiated with collaboration with Department of Social Welfare & Security which supervises old age homes and Senior Citizen’s Recreation Centres under GNCTD for further coordination and organizing various activities. The Project has expanded its horizon by initiating Free Denture delivery services to the patients of Project AMMA. November 2024 marks the launch

of an innovative initiative under Project AMMA of Mobile Dental Clinic Project: “Free Denture Delivery”.

Project Amma’s activities in September 2025:

The Project has expanded its horizon by initiating Free Denture delivery services to the patients of Project AMMA. November 2024 marks the launch of an innovative initiative under Project AMMA of Mobile Dental Clinic Project: “Free Denture Delivery”.

4.4 ASHA HUMARI MUSKAAN PROGRAM

As part of Project expansion and to enhance dental care accessibility, the project is regularly training ASHA Health Workers under the “Asha Hamari Muskaan Program: Linking Maternal & Child oral Health”. The Refresher training on oral health conducted for ASHA workers is vital for sustaining effective community health initiatives. It enhances the ability of ASHA workers to promote preventive oral care, identify and refer patients early, and contribute to the overall reduction in the burden of oral diseases, especially in underserved and rural areas. Regular training also keeps them motivated, empowered, and aligned with national health nearly 3000 ASHA/ANM workers and this initiative has been greatly appreciated by the Ministry of Health and Family Welfare, Govt. of India.

As per the recent communication received from the State Program Officer, now the Oral Health training will be extended to the all the ASHA/ANM trainings. A two-hour Session has been provided to the trainers/resource person from the MDCP, MAIDS.

Many training sessions are conducted in rural or remote locations in Delhi where ASHA workers operate. The Team of Mobile Dental Clinic Project has to travel long distances, often to areas with limited transportation options.

Overview:

Following the training, A Mobile Dental Clinic provided checkups for the ASHA workers, focusing on early detection and treatment of dental issues. A total **115** ASHA workers were trained and also their dental check-up was done for various dental diseases as well as training them in performing dental screening. The teams provided the Comprehensive

dental examinations, Oral health education and oral hygiene demonstrations and along with referrals for further dental treatment if necessary.

Hence, the training and subsequent dental checkups significantly contributed to the professional development of ASHA workers and their personal health. Continued collaboration between health teams and community workers is essential for improving community oral health. This initiative has not only empowered ASHA workers but also enhanced their capacity to contribute to community health effectively.

5. New Horizons

1. **Landmark Recognition and Expansion of Project NEEV by Department of Education, GNCTD Project NEEV:** School Oral Health Program under the Mobile Dental Clinic Project of the National Oral Health Program–Delhi, has achieved a significant milestone in its journey towards promoting oral health among schoolchildren. Owing to the sustained efforts, impactful implementation, and demonstrable success of the initiative

over the years, the Department of Education, Government of NCT of Delhi, has issued an official order directing all schools under GNCTD to extend full facilitation and cooperation for the activities of Project NEEV within their institutions.

This landmark achievement marks a major step forward in institutionalizing preventive oral health education and services across the school system of Delhi. The directive from the Department of Education will ensure enhanced outreach and uniform implementation

of oral health promotion, screening, and referral activities in schools, including those in far-flung areas. It reflects the recognition of Project NEEV as a model public health initiative contributing to the holistic well-being of children and underscores the collaborative commitment of the health and education sectors towards a “स्वस्थ मुस्कान , दिल्ली की शान ”

2. Active Participation of Mobile Dental Clinic Project in *Swasth Naari Sashakt Parivaar Abhiyaan*

The Mobile Dental Clinic Project, under the National Oral Health Program–Delhi, actively participated in the *Swasth Naari*

Sashakt Parivaar Abhiyaan organized by the Government of NCT of Delhi. The initiative, aimed at promoting health awareness and preventive screening among women and families, was conducted from 17th September 2025 to 2nd October 2025 across multiple

locations in Delhi. During the campaign, the Mobile Dental Clinic Project extended its comprehensive oral health screening and awareness services to diverse communities, covering around 31 locations and screening and treatment of 1816 individuals for various dental and oral health conditions.

The campaign was inaugurated on 17th September 2025 at the Delhi Secretariat by the Hon'ble Chief Minister of Delhi and the Hon'ble Health Minister of Delhi. The Mobile Dental Clinic Project set up a dedicated dental screening counter during the inaugural

event, which was visited by the Hon'ble Health Minister. The Hon'ble Minister appreciated the efforts and commitment of the project team in delivering quality dental care and in contributing to the success of this large-scale public health initiative.

Through its active participation, the Mobile Dental Clinic Project successfully integrated oral health into the broader preventive health framework of the *Swasth Naari Sashakt Parivaar Abhiyaan*. The project not only provided on-the-spot screening and counselling but also educated beneficiaries about maintaining good oral hygiene and the

importance of regular dental check-ups. Around 96 oral health education sessions were conducted during the event. This collaboration exemplified the inter-sectoral approach of the Government of NCT of Delhi in addressing health holistically. The contribution of the Mobile Dental Clinic Project ensured that oral health

remained an integral part of overall health promotion activities, thereby reaffirming the commitment of NOHP–Delhi towards achieving the goal of a healthier and more empowered communities.

MLA (Patparganj Constituency), Mr. Ravinder Negi visited Mobile Dental Van during Swasth Nari Sashakt Parivaar Abhiyaan

Municipal Councillor, Mrs. Renu Chaudhary also visited the van

3. Capacity Building under Mobile Dental Clinic Project – September 2025

As part of the ongoing capacity-building initiatives under the Mobile Dental Clinic Project, a significant training activity was conducted on 2nd and 3rd Sept. 2025 at Maharaja Agrasen Hospital, Delhi. Dr. Swati Jain, Senior Consultant under the Mobile Dental Clinic Project, was invited as a Resource Person for a two-day training program organized for school teachers of the West District, GNCT of Delhi. The program was held under the aegis of the National Tobacco Control Program (NTCP), Delhi, District West, with the objective of sensitizing educators on the harmful effects of tobacco and their role in creating a tobacco-free school environment.

general and oral health, as well as effective methods of tobacco cessation and de-addiction. The sessions were designed to empower teachers with the knowledge and skills to identify, counsel, and guide students towards healthy lifestyle choices.

TOBACCO KILLS- QUIT NOW! TOBACCO FREE DELHI/ INDIA
To Quit Tobacco Give a call on 1800112356

A total of 70 schoolteachers, representing various government, government-aided and public schools of the West District, participated in the training. Dr. Swati Jain conducted interactive sessions focusing on the ill effects of tobacco on

The sessions were highly appreciated by the participants and organizers alike for their engaging content and practical relevance. **This initiative marked an important step in strengthening inter-sectoral collaboration**

**between
the
National
Oral**

Health Program and the National Tobacco Control Program, thereby reinforcing the shared vision of promoting preventive health and creating tobacco-free educational environments across Delhi

4. Collaborative School Oral Health Initiative by Mobile Dental Clinic Project and NOHP–District South

The Mobile Dental Clinic Project, in collaboration with the National Oral Health Program, District South, GNCT of Delhi, successfully conducted a comprehensive dental screening and

oral health promotion activity across four schools in the South District of Delhi. During this initiative, a total of 400 students were screened for various dental ailments, with emphasis on early detection and preventive care. The activity aimed to strengthen school-based oral health interventions and ensure that children receive essential awareness and access to dental services within their learning environment. Following schools were covered:

S. No.	Name of School
1.	RSKV Mehrauli
2.	SKV Malviya Nagar
3.	SKV Chirag Delhi
4.	SKV Aya Nagar

In addition to screening, interactive oral health education sessions were organized to educate students about correct brushing techniques, the importance of maintaining oral hygiene, and the impact of diet on dental health. A quiz competition was also held to make the learning process engaging and to reinforce key oral health messages among children. To further promote healthy habits, dental kits were distributed to all participating students. **The initiative was well-received by school authorities and students alike, reflecting the effective community outreach and inter-district collaboration under the Mobile Dental Clinic Project and**

NOHP–

Delhi.

6. Monitoring & Evaluation of Mobile Dental Clinic Project

A. Digitalized Feedback Form

Monitoring and evaluation (M&E) are critical components of the Mobile Dental Clinic Project to ensure its effectiveness, efficiency, and continuous improvement. The M&E framework of the project focuses on assessing service quality, patient satisfaction, and the overall impact of dental outreach activities. In a recent innovation aimed at strengthening the evaluation process, the Consultant, Dr. Swati Jain, to systematically capture patient responses and assess the project's outcomes more accurately and efficiently, developed a Digital Feedback Form.

To facilitate easy access, a QR code was generated, allowing patients to conveniently scan and fill the digital form using their smartphones immediately after receiving treatment. This innovation has modernized the feedback collection process by replacing paper-based forms, reducing manual errors, and ensuring real time data collection and analysis. The digital feedback system became operational on 21st April 2025, marking a significant step

forward in patient engagement and project assessment. **In the month of Sept. 2025, a total of 101 digital feedback forms were successfully filled out by patients reflecting encouraging participation and acceptance of the new system.** The collected feedback is currently being analysed to derive insights into patient satisfaction, service quality, and areas needing improvement. This data-driven approach will significantly contribute to enhancing service delivery and strategic planning for future mobile dental camps.

Number of Feedback Forms collected for the month of August'25 – 153

B. Field Visits by Consultants

To ensure optimum utilization of resources and improved patient outcomes, the Consultants of the Mobile Dental Clinic Project conduct regular field visits. These visits help in closely monitoring the on-ground implementation, identifying challenges and gaps in service delivery, and facilitating timely corrective measures. This proactive approach ensures continuous improvement in the quality and effectiveness of dental care services provided through the project.

The Following field visits were conducted:

Date of Field Visit	Location	Field Visit By
01/09/2025	RSKV Mehrauli	Dr. Swati Jain
01/09/2025-03/09/2025	DGD Seelampur	Dr. Divyangi Goel
02/09/2025-03/09/2025	Maharaja Agrasen Hospital	Dr. Swati Jain
08/09/2025-09/09/2025	Lady Noyce School	Dr. Swati Jain
17/09/2025	Delhi Secretariat	Dr. Swati Jain
17/09/2025	Ayushmaan Arogya Mandir Dakshinpuri	Dr. Divyangi Goel
22/09/2025	Ayushmaan Arogya Mandir Shahganj	Dr. Divyangi Goel
